

Georgia "Alford" Marriages

Compiled by Gil Alford AAFA #0019

We have tried to make this Georgia marriage data as complete and correct as possible. Surely it is the most comprehensive list of Alford marriages in Georgia ever compiled. However, it is not without error and it certainly is not complete. We started to exclude the questionable records but decided not to. This is your data so why not give it all to you. We don't offer it as gospel and you will have to decide what to use and what to ignore. Perhaps you will see records for which you can send us corrections.

To the extent possible the source of our information is shown and it varies drastically from names of some of you, purchased collections to published sources. The names of members and contact sources are shown in lower case with last name last. [The Guy Alford collection which came from a contact is also lower case.] Published sources are identified only by the author or compiler in uppercase with last name first. If you need further identification of one of these let us know. "LDS NA VITAL REC" is the CD collection of Vital Records Index North America released by the LDS (Mormon) Church. "Genealogy Anyone" was something published by the Cairo Messenger of Cairo, GA many years ago. "Hunting for Bears" was a collection we purchased from a commercial compiler years ago. "37000 EARLY GA MA" is a published source where we deviated from the pattern. In some cases we have two or more sources for the same data but we list only one. In the case of member or contact sources the reference is ambiguous. This marriage data comes from the master data base which contains birth, death, burial, marriage, and parental data. The member source refers to the total record and may not apply specifically to the marriage should it have come from a separate source. Our reference system is less than perfect.

The names shown on our list may not be the exact same as those shown on the marriage source. We have an ongoing program of enhancing all of our data so if a more proper name was known it is what is listed. Some records do beg an explanation which we don't have. For example, two sources show different counties for Nancy Alford's marriage to Larkin Culpepper on Dec 30 1841. Were the bride and groom from different counties and the event recorded in both counties? Ditto for William L. Alford's marriage to Mary Hutchinson. Note some spelling differences here also. There is another case where the same event has the names of two different spouses but we only list one of them. Our listing shows Henry William Allford marrying Georgey Coates based on the LDS vital records index which listed as their source their own FHL #394054 which is probably a microfilm of selected Georgia vital records. The late Guy Alford in his work shows that Henry William Alford married Mary Bryant and he cites marriage book F, page 162. All this to prove that unless you have a copy of a signed and dated marriage document in your hand you cannot be 100% certain of the data you have.

Had we culled these records in some way for you we would have eliminated those with incomplete dates or missing counties. But, hey! maybe you can fill those for us. Besides this ought to be shared with you. What we have in some of these cases is nothing more than assumption by extrapolation- and some of that is probably poor.

This same data is available on our web site arranged by county. If you have serious need for a similar list arranged by spouse, marriage date or source then contact us.

You can help. Go find out what is correct by going to some courthouses and checking the marriage records there. They are the next best thing to the actual marriage certificate. Better yet go to some courthouses and find more Alford marriage records. Considering the number of Alfords who have lived in Georgia over the last 200 years we don't have a drop in the bucket.
