North Carolina "Alford" Marriages

Listed below are all of "Alfords" for whom we have complete marriage data in our master data file. There are several more but either the date or the county data is missing.

We would appreciate any help you can provide in expanding this list. That can be done by sending in data on marriages not listed or improving on the data shown. In many cases the "Alford" is shown with initials for a first name. Likewise a few of the spouses have only initials. If you can elaborate on those initials we would be most appreciative.

It is possible that some of the "Alford" females were in fact widows and "Alford" was not their maiden name. If you know of such cases please advise.

There are a couple of records where we have an obvious error but do not have the background to make the correction. They are identified with a question mark "?" between the spouse name and the marriage date. Let us know if you can clarify these.
