

AAFA Census Data

This census report is a product of the AAFA census team. The initial list of names to be extracted was prepared from published census indexes and, in some cases, supplemented by unindexed entries. The every name extraction was performed using the microfilm as a source, and the extraction has been verified for completeness and accuracy.

The following data is not intended to reflect either the "true" facts or what descendant families believe to be the facts. It is also not guaranteed to be without error. Nevertheless, every attempt has been made to provide a complete and faithful representation of the information recorded on the original enumeration forms.

The order of the information in the two line family header: the name of the post office or enumeration district, City or Township, and county. On the 2nd line: microfilm roll number, census page number, census dwelling or house number, census family number, and the enumeration date.

*The categories on each line appear in the following order: name, sex, age in years or months (two columns), color (assumed to be white unless shown otherwise), birthplace, *MSR, property, and occupation. In the case of infants, the age is expressed in months, in which case the year column is left blank.*

Column headings not meant to line up exactly over the data but rather to give position relationship

FIRST NAME	LAST NAME	SEX	AGE	AGE	COL	BP	S	M	R	PROPERTY	OCCUPATION
										REAL & PERSONAL	
				MOS							

** Data collected in 1860 included information on marriage, school attendance and literacy:*

M = married within the year

S = attended school within the year

R = can't read or write

Birthplace is shown with the approved postal abbreviations for states in the U.S. Foreign places, if applicable, were abbreviated as follows: BD = Baden, CD = Canada, EN = England, FR = France, GM = Germany, HN = Hanover, IR = Ireland, NR = Not Recorded, NW = Norway, PR = Prussia, ST = Scotland, SW = Sweden, etc.
