

# AAFA Census Data

## "Alfords" Found In The 1870 North Carolina Census Alicia R. Houston AAFA OOOI, AAFA Census Project Officer

Data extracted by Bill Mitchiner.  
Data verified by Robin Sterling.  
Computer input by Gil Alford.

Arranged by county, page and dwelling as enumerated.

For most subjects the age is expressed in years immediately after the sex entry. In some cases - particularly with infants - the age is expressed in months in which case the age column is blank. When the age is expressed in months it is in the next seldom used column immediately after age. In 1870 the census taker was also supposed to record the month of birth and that is shown, as a number, in the next column.

Color, when shown is just before the place of birth. It is assumed to be white unless otherwise specified.

Birthplace is shown with the approved postal abbreviations for states in the U.S.

When the birthplace was not shown NR or \_\_ is used.

Foreign places, when applicable, were abbreviated as follows: GM= Germany

More data was collected in 1870 than in any prior year. The information is coded as follows:

S = in school this year. A number in the second two spaces indicates the month of the census year in which the subject was married.

R = can't read and/or write (in some cases the enumerator indicated they could not write and that is indicated by W.

V = eligible to vote.

If either of the parents of the subject was foreign born then an F denotes the father was and an M that the mother was.

Data arrangement or format is as follows. Most records will not include data for each field or in each column:

FIRST NAME	LAST NAME	SEX	AGE	AGE	MOB	COL	BP	S	M	R	V	F	M	OCCUPATION	PROPERTY
				MOS					M			B	B		REAL & PERSONAL
