Data extracted by Gil Alford.
Computer input by Gil Alford.

DRAFT

Arranged by county, township and page as enumerated.

For most subjects the age is expressed in years immediately after the name.

In some cases - particularly with infants - the age is expressed in months in which case the age column is blank. The age is expressed in months in the next column. In 1880 the month of birth was recorded and it is shown next.

Birthplace is shown with the approved postal abbreviations for states in the U.S.

Foreign places were abbreviated as follows: BV = Bavaria, EN = England, MX = Mexico, NW = Norway.

In 1880 the enumerators were required to ask about marital status.

Responses are shown under 'MAR'- S=single, M=married, W=widowed and D=divorce.

Questions were asked about attending school and if the subject could read and write. If attending school there is an S entered. R or W means the subject could not read or write.

Parents place of birth is another new data item in 1880 and it is shown under FB and MB

Column headings not meant to line up exactly over the data but rather to give position relationship
