

# "Alfords" in the 1900 TEXAS Census

FIRST NAME	LAST NAME	Relation	AGE	AGE MOS	BORN MO YEAR	CYOB COL	BIRTHPLACE
------------	-----------	----------	-----	------------	-----------------	----------	------------

---

Data extracted by Janice Smith, and computer input by Janice Smith. Not verified by AAFA census team.

Unlike most 1900 census units done by AAFA to date this one is more than the Soundex record. Janice Smith extracted all of the Alfords from all of the applicable microfilms and keyed the data to a computer file. This format is similar to that used for the Soundex reports. For a full report on the Texas 1900 census see a separate publication of just that.

Arranged by county, census volume, enumeration district and page as enumerated.

In 1900 questions asked included month and year born. That information is displayed immediately after the age.

CYOB or circa year of birth is not from the census. It has been added to this draft to assist AAFA researchers who may be working with this document. The CYOB is also used as a checkpoint to verify the enumeration data. The CYOB was calculated by the computer by subtracting age from 1900 and excluded for infants.

Color is shown after the circa year of birth. It is assumed to be white unless otherwise specified. In most instances the color was recorded only for the head of the household.

Birthplace is shown with the approved postal abbreviations for states in the U.S.  
Foreign places were abbreviated as follows: GM = Germany, FR = France

Column headings not meant to line up exactly over the data but rather to give position relationship
