### **PART III**

---

## **THE 1994 ALFORD U.S. DIRECTORY**

---

### **INDEX BY STATE**

---

#### **How To Use This Index**

This National Directory of Alford families lists the current names and addresses of over 10,196 Alford households in the United States. It is an invaluable tool for finding long lost members of the family or conducting research on your family name. By contacting the households listed, you can discover which of these Alford families could be related to you. It is particularly helpful in terms of matching your surname with a given locality.

The entries in this section are arranged geographically by state. To locate a specific household, first look up the state in the index, then refer to the first name alphabetically.

NOTE: These names and addresses have been extracted from various national sources such as telephone listings, automobile registrations, election rolls and other public records. This information has been updated annually in order to maintain the most current resident records available. In rare instances, however, families who should have been listed in the directory are missing. This may be due to the fact that 1 out of every 10 residents moves to a new address each year, or because of errors in the original sources.
