

"ALFORD" SOCIAL SECURITY NUMBERS FOR ARIZONA

The following list was compiled from the AAFA main data base, and was limited to the records for which there is a social security number (SSN) entered in the file.

Data found in the social security death index (SSDI) may have been enhanced by other AAFA data.

Searches may be made for any name and any SSN at the link below. The better searches require that you use the advanced search option.

<http://ssdi.rootsweb.ancestry.com>

Birth and death dates are formatted as yyymmdd.

"Birth places" might be the state in which the SSN was acquired.

When the county of birth or death is known the county name is abbreviated after the state name.

This list is not complete and may contain error. It is probable that some of the females are Alford spouses and not one with Alford blood.

It would be appreciated if errors noted were brought to our attention by sending email to

alford_association@sbcglogal.net

Additional records would also be appreciated. They should be submitted as an xls file in the format as below.
