

## Kentucky Alford Births

A similar list of Kentucky births was published in AAFA ACTION #38, Fall 1997, Vol. X, No. 2, page 24. That list of about eight pages was limited to records from the Kentucky archives, all had Volume- Certificate (VC) number. The date format was more traditional and the county names were spelled out. AAFA members Pauline Leger Alford and Elmer Miller collected and submitted that data.

This web site list is about twice the size of the one mentioned above. It uses the date format of most of our databases: YEARMODA and our *standard* location format ST COUN. While the list above did include the mothers, the new list also shows the father s name when it appeared in our AAFA record.

About our AAFA record. We don t maintain separate birth records, but rather birth is just one of several events in a subjects master record. The record also has death and marriage dates and place plus other data. The birth information was filtered out for this listing. We don t claim that this data is 100% correct or any where near complete. As with all AAFA data it is a work in progress. Please bring errors and omissions to our attention.

That brings us to the source listed. The source in the master record might pertain to any one of the many elements included in the record and may not, in some cases, work for the birth. The following is an explanation of several of the source formats. If you have trouble with a source and it is important to you then send an email to [aafa@alfordassociation.org](mailto:aafa@alfordassociation.org) and ask for further information.

VC \*\*\* is the volume certificate number and does pertain to births.

00/00 #00000 where the 0 are valid numbers are for death records and again volume and certificate numbers. It is possible the birth date was derived from the death certificate.

SSDI is the social security death index and usually pertains to both a birth and death date.

Pending means nothing other than we are working on it.

AAI is the abbreviation for a series of CD s and usually pertains to marriage data.

BAS or bas is the code for one of the AAFA members who was responsible for obtaining much Kentucky data.

Be on the lookout for other Kentucky data, either here on the web site or in the AAFA quarterly, AAFA ACTION.
